
Dear ADRC Colleague,

We are excited to update you on the status of the new UDSv4 forms and invite you to provide input on the modern submission system, pipeline/database, and search interface that NACC is developing.

We had an outstanding attendance for the June 3rd CTF-NACC UDSv4 Forms Update Webinar with more than 300 participants.

We look forward to keeping you in the loop as UDSv4 progresses. The June 3rd Webinar covered some of the new UDS content, provided an overview of the modern systems coming online at NACC, and how REDCap can facilitate capturing the UDS at ADRCs.

We'd love your input!

Provide input on the UDS form content:

If you attended the webinar or watched the recording, we would like your input on the new UDSv4 content. The new questions for subjective cognitive decline and mild behavioral impairment are included in the REDCap survey.

Please complete the UDSv4 feedback survey by **June 16.**

Provide your input on the new UDSv4 content

Provide input on the new modern platforms that NACC is building in collaboration with the ADRC community.

Data Front Door: NACC, NCRAD, and NIAGADS are eager to partner with ADRD researchers and clinicians from across the Alzheimer's Disease Research Centers (ADRC) Program and beyond to build the "Data Front Door" (DFD). The DFD will serve as a one-stop-shop data search, visualization, and access interface for all ADRC data. We would love your input on the requirements for this platform.

Sign up to participate in a DFD focus group

Provide input on DFD requirements

The Electronic Data Capture (EDC) Workgroup - Join us!
NACC is currently collaborating with 71 people across 26 of the ADRCs to build an electronic data capture solution for UDSv4. The EDC workgroup, launched this past January, is focused on co-developing REDCap forms, defining requirements, and developing training and education materials.
