*NOTE: Version 2 is NOT the most current version of the FTLD Moudle forms and is no longer used for data submission. For the most current version, please visit <http://www.alz.washington.edu>.*

This Data Template last modified June 18, 2012.

## FTLD Module to the Uniform Data Set

# Data Template for the Initial Visit Packet

## Preface

This template is designed to help the Data Cores at the Alzheimer's Disease Centers develop software for submitting FTLN data to NACC. In this template, data elements are organized by form and, within the form, by item number. For each data element, the template lists the element name, element type, columns for ASCII file submission, and item number.

**This template is needed only for file submission.** Centers using web data entry will not need this template.

A more detailed description of each data element is found in the Data Element Dictionary for the FTLN Initial Visit Packet.

Please note:

- The first 10 data elements are the same for each form, and hence for each template. These elements — which are required — are shaded on the template.
- For ASCII fixed-format files, exactly one blank space is required between the data fields of adjacent variables. Although a data field may in some cases contain one or more blanks, the required separator blank must still be included. Column assignments and column alignment must be maintained.
- For SAS files, all data elements must be present in the file.
- For tab-delimited files, all fields must be separated by one tab.
- For comma-delimited files, all fields must be separated by one comma. Fields containing commas must be contained in quotation marks.
- In some cases, the item number shown in the template does not appear in the form. This is true for most "Other (specify)" text items and dates.

# Coding for form header

(first 10 data elements on each form)

---

<b>PACKET</b>	=	<b>IF</b> (The letter I, for the Initial Visit FTLD Module)
<b>FORMID</b>	=	<b>Form ID</b> (I.e., Z1F, A3A, A3F, etc.)
<b>FORMVER</b>	=	<b>2</b> Although this is the first version of the FTLD forms, the FORMVER is 2 because the FTLD Module was initially created to be used with Version 2 of the UDS.
<b>ADCID</b>	=	<b>Center ID</b> The same number used in the MDS and NP data for your Center; see the Data Element Dictionary for the FTLD Module or the UDS for a list of Center IDs.
<b>PTID</b>	=	<b>Patient ID</b> Follow your Center's patient ID scheme. For each subject, patient ID: <ul style="list-style-type: none"><li>• must be <b>unique</b> within the data set from your Center — no duplicate Patient IDs are permitted;</li><li>• must be the <b>same for each visit</b> in the FTLD Module; <b>and</b></li><li>• must be the same PTID used for that subject in all the NACC databases (<b>UDS, MDS, and NP</b>).</li></ul> PTID cannot be changed once it has been assigned by your Center. Because this is a character field, you must include or exclude leading zeros to match ID numbers across all data sets.
<b>VISITMO</b> <b>VISITDAY</b> <b>VISITYR</b>	=	<b>Actual date of the interview</b> ; cannot precede 01/01/2012
<b>VISITNUM</b>	=	<b>Visit ID</b> Assigned by your Center; need not start with 1
<b>INITIALS</b>	=	<b>Examiner's initials</b> (Initials of the person conducting the interview)

## FORM Z1F
