## Form C5F: Interpersonal Reactivity Index<sup>1</sup> co-PARTICIPANT QUESTIONNAIRE

### INSTRUCTIONS FOR THE CENTER

This questionnaire is designed to be completed **independently by the co-participant**, who will be describing the subject's current typical behavior. This form may be handed to the co-participant for completion by him- or herself at any time during the study visit. If the co-participant asks for clarification of questions, it is acceptable for a qualified psychologist or psychometrist to discuss the questionnaire with him or her. However, if the co-participant completes this questionnaire collaboratively with the clinician, either face-to-face or via telephone, **you must inform NACC of this change in protocol** by checking the appropriate box in the gray "FOR CLINIC USE ONLY" area at the top of the questionnaire.

Before the co-participant leaves, clinic staff should make sure that all questions were completed by the co-participant (i.e., none was left blank) by discussing the missing item with the co-participant and encouraging them to provide a response. If this is not done and it is later noticed that some items were missed by the co-participant, clinic staff should call the co-participant as soon as possible so that the missing items can be completed by phone. In this case, the questionnaire is not considered to have been completed independently by the co-participant. In the shaded area at the top of the form, the appropriate response would therefore be, "This questionnaire was completed via telephone interview of co-participant by clinic staff."

If there are still missing items, these items should be left blank, and "88" should be entered for the Empathic Concern (EC) Score and
