NEUROPATHOLOGY DATA SET

Data Template for the Neuropathology Form

Preface

This template is designed to help the Data Cores at the Alzheimer's Disease Centers develop software for submitting NP data to NACC. In this template, data elements are organized by item number. For each data element, the template lists the element name, element type, columns for ASCII file submission, and item number.

This template is needed only for file submission. Centers using web data entry will not need it.

A more detailed description of each data element is found in the Data Element Dictionary for the Neuropathology Data Set.

Please note:

- For ASCII fixed-format files, exactly one blank space is required between the data fields of adjacent variables. Although a data field may in some cases contain one or more blanks, the required separator blank must still be included. Column assignments and column alignment must be maintained.
- For SAS files, all data elements must be present in the file.
- For tab-delimited files, all fields must be separated by one tab.
- For comma-delimited files, all fields must be separated by one comma. Fields containing commas must be contained in quotation marks.
- In some cases, the item number shown in the template does not appear in the form. This is true for most "Other (specify)" text items and dates.

| Variable length | Columns | Variable name | Character or Numeric | Item # |
|-----------------|---------|-----------------|----------------------|--------|
| 2 | 1-2 | ADCID | N | 0 |
| 10 | 4-13 | PTID | C | 1 |
