

# Form D1a: Clinical Syndrome

ADRC: \_\_\_\_\_ PTID: \_\_\_\_\_ Form date: \_\_\_/\_\_\_/\_\_\_\_\_ Visit #: \_\_\_\_\_ Examiner's initials: \_\_\_\_\_

Language:  
 1 English  
 2 Spanish

**INSTRUCTIONS:** This form is to be completed by the clinician. For additional clarification and examples, see the [UDS Coding Guidebook for Form D1a](#). Check only one box per question.

1. Diagnosis method—responses in this form are based on diagnosis by a:  
 1 Single clinician     2 Formal consensus panel     3 Other (e.g., Two or more clinicians or other informal group)

## Section 1 – Level of impairment – Unimpaired cognition/behavior, SCD, MCI/MBI, or dementia

2. Does the participant have:  
 1. Unimpaired cognition (e.g., cognitive performance and functional status (i.e., CDR) judged to be unimpaired)?  
 AND  
 2. Unimpaired behavior (i.e., the participant does not exhibit behavior sufficient to diagnose MBI – see MBI section starting at Q7) or dementia due to FTLD or LBD and/or FTLD behavior and language domains=0?  
 0 No (SKIP TO QUESTION 3)     1 Yes (CONTINUE TO QUESTION 2a)

*Note: For those with longstanding cognitive impairment that does not represent a decline from their usual functioning, consider checking **Question 5b** for a diagnosis of “Cognitively Impaired, Not MCI/dementia”.*

### Subjective Cognitive Decline

- 2a. Does the participant report 1) significant concerns about changes in cognition **AND** 2) no neuropsychological evidence of decline **AND** 3) no functional decline?     0 No (END FORM HERE)  
 1 Yes
- 2b. As a clinician, are you confident that the subjective cognitive decline is clinically meaningful?     0 No (END FORM HERE)  
 1 Yes (END FORM HERE)

### Dementia criteria

**Requirement #1:**  
 Participant has cognitive or behavioral (neuropsychiatric) symptoms that meet all of the following criteria:

- Interfere with ability to function as before at work or at usual activities
- Represent a decline from previous levels of functioning
- Are not explained by delirium or major psychiatric disorder
- Include cognitive impairment detected and diagnosed through a combination of: 1) history-taking; 2) objective assessment (bedside or neuropsychological testing)

**Requirement #2:**  
 Participant must have impairment in one\* or more of the following domains:

- Impaired ability to acquire and remember new information
  - Impaired reasoning and handling of complex tasks, poor judgment
  - Impaired visuospatial abilities
  - Impaired language functions
  - Changes in personality, behavior, or compomentment
- \* In the event of single-domain impairment (e.g., language in PPA, behavior in bvFTD, visuospatial in posterior cortical atrophy, etc.), the participant must not fulfill criteria for MCI.*

3. Does the participant meet criteria for dementia?     0 No (CONTINUE TO QUESTION 4)  
 1 Yes (SKIP TO QUESTION 6a)

**Section 1 – Level of impairment** *continued...*

**MCI core clinical criteria**

Check all criteria that apply in Q4.

4.  1 Clinical concern about decline in cognition compared to participant’s prior level of lifelong or usual cognitive function (e.g., based on input from participant, co-participant, and/or the clinician’s judgment, CDR SB 0.5+, etc.)  
 1 Impairment in one or more cognitive domains, compared to participant’s estimated prior level of lifelong or usual cognitive function, or supported by objective longitudinal neuropsychological evidence of decline  
 1 Largely preserved functional independence OR functional dependence that is not related to cognitive decline (e.g., based on clinical judgment)

If all three criteria are checked, choose **1=Yes** for Q4b. If less than 3 criteria are met, choose **0=No** for Q4b. If only some of the criteria from Q4 are checked, with the exception of the third MCI criteria **alone**, consider a diagnosis of **cognitively impaired, not MCI/dementia** on Q5b. If **only** the third MCI criteria is met in Q4, select **0=No** for Q5b.

- 4b. Does the participant meet all three of the above criteria for MCI (amnesic or non-amnesic)?  0 No (**CONTINUE TO QUESTION 5**)  
 1 Yes (**SKIP TO QUESTION 6a**)

**Cognitively impaired, not MCI/dementia**

The purpose of the “Cognitively impaired, not MCI/dementia” category is to capture those individuals with evidence of cognitive impairment or decline who do not meet formal MCI criteria.

Check all applicable criteria for cognitively impaired, not MCI/dementia in Q5, using any relevant data.

5.  1 Evidence of functional impairment (e.g., CDR SB>0 and/or FAS>0), but available cognitive testing is judged to be normal  
 1 Cognitive testing is abnormal but no clinical concern or functional decline (e.g., CDR SB=0 and FAS=0)  
 1 Longstanding cognitive difficulties, not representing a decline from their usual function (e.g., early developmental differences remote TBI, other medical condition with clear effects on cognition)  
 1 Other (**SPECIFY**): \_\_\_\_\_

If any of the criteria in Q5 are met choose **1=Yes** for Q5b.

- 5b. Does the participant meet any criteria for cognitively impaired, not MCI/dementia?  0 No (**SKIP TO QUESTION 7**)  
 1 Yes (**SKIP TO QUESTION 7**)

**Affected Domains – Dementia and MCI**

Choose domains that are impaired at the current visit based on clinical judgment informed by clinical history and neuropsychological testing. Select one or more as **Impaired**; all others will default to **unimpaired** in the NACC database.

Note on **behavior changes**: For patients with *dementia* who have behavior changes, record the presence of behavioral changes here (not in the following MBI section) by marking Q6f as **Impaired** and skipping the MBI section (**SKIP TO Q8**). For behavioral changes in the context of an MCI (or as an isolated) symptom, consider a diagnosis of MBI in the next section.

		Impaired
6a.	Memory	<input type="checkbox"/> 1
6b.	Language	<input type="checkbox"/> 1
6c.	Attention	<input type="checkbox"/> 1
6d.	Executive	<input type="checkbox"/> 1
6e.	Visuospatial	<input type="checkbox"/> 1
6f.	Behavioral (for participants with dementia only; see MBI for MCI participants)	<input type="checkbox"/> 1
6g.	Apraxia	<input type="checkbox"/> 1

**Section 1 – Level of impairment** *continued...*

**Mild Behavioral Impairment (MBI) core clinical criteria**

- Participant, co-participant, or clinician identifies a change in the participant’s affect, motivation, thought content, behavior, or personality that is clearly different from their usual affect, motivation, thought content, behavior, or personality
- Symptoms have been present at least intermittently for the last six months or longer
- Late onset (i.e., age > ~50, unless early onset neurodegenerative syndrome is suspected)
- Not explained by delirium, other psychiatric disorder by DSM criteria (including recent onset, longstanding or recurrence of longstanding disorder).
- Symptoms interfere with at least one of these: work, interpersonal relationships, social activities
- Largely preserved independence in other functional abilities (no change from prior manner/level of functioning, or uses minimal aids or assistance)

7. Does the participant meet criteria for MBI?  0 No (**SKIP TO QUESTION 8**)  
*(If participant meets criteria for dementia an MBI diagnosis is excluded.)*  1 Yes (**CONTINUE TO QUESTION 7a**)

**MBI affected domains** — Select one or more affected domains  
*(Note: If “Yes” is indicated in any domain below, the participant should have a corresponding symptom checked on Form B9 — Clinician Judgment of Symptoms, either from among the specific symptoms denoted there, or in “other”)*

	No	Yes
7a. Motivation (e.g., apathy symptoms on Form B9)	<input type="checkbox"/> 0	<input type="checkbox"/> 1
7b. Affective regulation (e.g., anxiety, irritability, depression, and/or euphoria symptoms on Form B9)	<input type="checkbox"/> 0	<input type="checkbox"/> 1
7c. Impulse control (e.g., obsessions/compulsions, personality change, and/or substance abuse symptoms on Form B9)	<input type="checkbox"/> 0	<input type="checkbox"/> 1
7d. Social appropriateness (e.g., disinhibition, personality change, and/or loss of empathy symptoms on Form B9)	<input type="checkbox"/> 0	<input type="checkbox"/> 1
7e. Thought content/perception (e.g., delusions and/or hallucinations on Form B9)	<input type="checkbox"/> 0	<input type="checkbox"/> 1

**Section 2 – Clinical syndrome**

**The purpose of Section 2 is to assign a predominant clinical syndrome** to participants with dementia and, when appropriate MCI or MBI, using all available clinical, exam, and neuropsychiatric data. This should be done using clinical information and cognitive/neuropsychological testing, **ideally without reference to biomarker data** (which is incorporated into the Etiological Diagnoses section in Form D1b). This is not always possible and thus Q9 allows centers to record when biomarker data is known and may have influenced the clinical diagnosis.

8. Is there a predominant clinical syndrome?  0 No (**SKIP TO QUESTION 10**)  
*Note that the participant may not meet any clinical criteria or may not have a predominant syndrome (for instance, this is common for MCI and “impaired, not MCI”). In this case, select “No.”*  1 Yes

Select the predominant syndrome as present; all others will default to Absent in the NACC database. **Present**

8a. Amnestic predominant syndrome		<input type="checkbox"/> 1
8b. Dysexecutive predominant syndrome		<input type="checkbox"/> 1
8c. Primary visual presentation (such as posterior cortical atrophy (PCA) syndrome)		<input type="checkbox"/> 1
8d. Primary progressive aphasia (PPA) syndrome:		<input type="checkbox"/> 1
8d1. <b>If present, select one:</b> <input type="checkbox"/> 1 Semantic PPA <input type="checkbox"/> 2 Logopenic PPA <input type="checkbox"/> 3 Nonfluent/agrammatic PPA <input type="checkbox"/> 4 Primary progressive apraxia of speech <input type="checkbox"/> 5 PPA other/not otherwise specified		
8e. Behavioral variant frontotemporal (bvFTD) syndrome		<input type="checkbox"/> 1
8f. Lewy body syndrome		<input type="checkbox"/> 1
8f1. <b>If present, select one:</b> <input type="checkbox"/> 1 Dementia with Lewy bodies <input type="checkbox"/> 2 Parkinson’s disease <input type="checkbox"/> 3 Parkinson’s disease dementia syndrome		
8g. Non-amnestic multidomain syndrome, not PCA, PPA, bvFTD, or DLB syndrome		<input type="checkbox"/> 1

**Section 2 – Clinical syndrome** *continued...*

		Present
<b>8h.</b>	Primary supranuclear palsy (PSP) syndrome	<input type="checkbox"/> <sub>1</sub>
<b>8h1.</b>	If present, select one: <input type="checkbox"/> <sub>1</sub> Richardson's syndrome criteria <input type="checkbox"/> <sub>2</sub> Non-Richardson's	
<b>8i.</b>	Traumatic encephalopathy syndrome	<input type="checkbox"/> <sub>1</sub>
<b>8j.</b>	Corticobasal syndrome (CBS)	<input type="checkbox"/> <sub>1</sub>
<b>8k.</b>	Multiple system atrophy (MSA) syndrome	<input type="checkbox"/> <sub>1</sub>
<b>8k1.</b>	If present, select one: <input type="checkbox"/> <sub>1</sub> MSA-predominant cerebellar ataxia (MSA-C) <input type="checkbox"/> <sub>2</sub> MSA-predominant Parkinsonism (MSA-P) <input type="checkbox"/> <sub>3</sub> MSA-predominant dysautonomia	
<b>8l.</b>	Other ( <b>SPECIFY</b> ): _____	<input type="checkbox"/> <sub>1</sub>

**9.** Indicate the source(s) of information used to assign the clinical syndrome:  
 Select one or more as **Yes**; all others will default to **No** in the NACC database.

		Yes
<b>9a.</b>	Clinical information (history, CDR)	<input type="checkbox"/> <sub>1</sub>
<b>9b.</b>	Cognitive testing	<input type="checkbox"/> <sub>1</sub>
<b>9c.</b>	Biomarkers (MRI, PET, CSF, plasma)	<input type="checkbox"/> <sub>1</sub>

**Section 3 – Primary or contributing non-neurodegenerative or non-CVD conditions**

The purpose of Section 3 is to identify conditions or disorders that are present and potentially contributing to the clinical syndrome. This must be filled out for those with cognitive or behavioral impairment (i.e., MCI, MBI, dementia, etc.) Indicate whether a given condition is a primary, contributing, or non-contributing cause of the observed impairment, based on the clinician's best judgment.

Select one or more condition(s) as **Present**; if there are no primary or contributing non-neurodegenerative or non-CVD conditions, leave all conditions blank. All conditions left blank will default to **Absent** in the NACC database. *Only one diagnosis should be selected as 1 = Primary.*

\*In order to diagnose a disorder, **DSM-5-TR criteria require** that symptoms cause clinically significant distress or impairment in social, occupational, or other important areas of functioning. For more guidance see the **UDS Coding Guidebook, Form D1a**.

Condition		Present				
			Primary	Contributing	Non-contributing	
<b>10.</b>	Major depressive disorder (DSM-5-TR criteria*)	<input type="checkbox"/> <sub>1</sub>	<b>10a.</b>	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
<b>11.</b>	Other specified depressive disorder (DSM-5-TR criteria*)	<input type="checkbox"/> <sub>1</sub>	<b>11a.</b>	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
<b>12.</b>	Bipolar disorder (DSM-5-TR criteria*)	<input type="checkbox"/> <sub>1</sub>	<b>12a.</b>	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
<b>13.</b>	Schizophrenia or other psychotic disorder (DSM-5-TR criteria*)	<input type="checkbox"/> <sub>1</sub>	<b>13a.</b>	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
<b>14.</b>	Anxiety disorder (DSM-5-TR criteria*)	<input type="checkbox"/> <sub>1</sub>	<b>14a.</b>	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
		If present, ( <b>SPECIFY</b> ) (check all that apply):				
<b>14b.</b>	<input type="checkbox"/> <sub>1</sub> Generalized anxiety disorder					
<b>14c.</b>	<input type="checkbox"/> <sub>1</sub> Panic disorder					
<b>14d.</b>	<input type="checkbox"/> <sub>1</sub> Obsessive-compulsive disorder (OCD)					
<b>14e.</b>	<input type="checkbox"/> <sub>1</sub> Other ( <b>SPECIFY</b> ) : _____					
<b>15.</b>	Post-traumatic stress disorder (PTSD)(DSM-5-TR criteria*)	<input type="checkbox"/> <sub>1</sub>	<b>15a.</b>	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>

**Section 3 – Primary or contributing non-degenerative or non-CVD conditions** *continued...*

Condition		Present		Primary	Contributing	Non-contributing
16.	Developmental neuropsychiatric disorders (e.g., autism spectrum disorder (ASD), attention-deficit hyperactivity disorder (ADHD), dyslexia)	<input type="checkbox"/> <sub>1</sub>	16a.	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
17.	Delirium (DSM-5-TR criteria*)	<input type="checkbox"/> <sub>1</sub>	17a.	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
18.	Other psychiatric disorder (DSM-5-TR criteria*)	<input type="checkbox"/> <sub>1</sub>	18a.	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
<b>18b.</b> If present, (SPECIFY): _____						
19.	Traumatic brain injury <i>(Distinct from TES and CTE, which are documented as a Clinical Syndrome and Etiologic Diagnosis, respectively)</i>	<input type="checkbox"/> <sub>1</sub>	19a.	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
20.	Epilepsy	<input type="checkbox"/> <sub>1</sub>	20a.	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
21.	Normal-pressure hydrocephalus	<input type="checkbox"/> <sub>1</sub>	21a.	<input type="checkbox"/> <sub>1</sub>	<input type="checkbox"/> <sub>2</sub>	<input type="checkbox"/> <sub>3</sub>
