

Biospecimen Task Force

For the ADCs

Membership

- Eileen Bigio – Northwestern
 - Virginia Buckles – Wash U
 - Doug Galasko – UCSD
 - Brad Hyman – Mass Gen
 - Ruth Mulnard – UC Irvine (Chair)
 - Elaine Peskind – U Washington
 - Joe Rogers – Sun Health
 - Julie Schneider – Rush
 - Bud Kukull – NACC (ex officio)
 - Tony Phelps – NIA (ex officio)
-

Task Force Goal

- Long-term goal – evolve a document that captures “best practices” for the ADCs
 - To provide interim guidance for the Alzheimer’s Disease Centers until HHS or the NIH issues agency-wide regulations
 - Our interim document can be modified at that time
 - Create guidelines that are generic enough to allow each Center to operationalize per Center-specific special needs
-

NIH and HHS

- NIH and HHS policy is currently under development to address regulatory issues related to biospecimens
 - Guidelines will pertain to all biospecimens, whether brain banks, or other repositories collecting blood, CSF, or cell lines
 - NCI guidelines will likely be influential to the work of the NIH and HHS
 - NCI guidelines provide a good starting point for the ADCs
-

Components of Our Work

- ❑ Specimen storage policies
 - ❑ Specimen distribution and sharing policies
 - ❑ I.P. - Material transfer agreements
 - ❑ Relationships with “for profit entities”
 - ❑ Cost recovery practices
 - ❑ Ethical issues related to collection and distribution
 - ❑ Informatics support
-

Methods for Task Force Work

- Extensive readings from existing guidelines / documents / sources
 - Conference calls (monthly) to present, discuss, and make recommendations
 - In-person meeting (October 6, 2006)
 - Presentations at ADC Director's meetings
 - Recommendations to conclude Spring 2007
-

Presentations

- ADC Neuropath Core Leaders mtg. – Sept 11, 2006; San Francisco
 - Fall ADC Director's mtg. – Oct 7, 2006; Chicago
 - Spring ADC Director's mtg. – Apr 2007; Boston
-
