How Can NIA/ADEAR Help You?

- **Registering Clinical Trials/Studies.** PIs now have responsibility for registering clinical trials in ClinicalTrials.gov and meeting legal requirements. ADEAR will continue the AD clinical trials database and can provide technical assistance for registering trials. For more information, see <http://prsinfo.clinicaltrials.gov> or contact Jill Chance, ADEAR Clinical Trials Librarian at 240-235-1992 or email trials@nia.nih.gov.
- **Send Us Your Papers!** The NIA Communications Office is interested in sharing news about NIA-funded research. When you submit a paper to a journal (or latest, when it is accepted), please e-mail a copy to nianews3@mail.nih.gov. NIA staff will consider it for a possible news release, inclusion in our online newsletters, or other venue. Please call 301-496-1752 or e-mail Peggy Vaughn (Peggy.Vaughn@nih.gov) or Barbara Cire (cireb@mail.nih.gov) if you have questions.
- **Let Us Know About Your Events.** Remember to let ADEAR know about upcoming research or caregiver conferences. We can highlight these events in *Connections*, the ADEAR online calendar, and email alerts.
- **Use the ADC Article Bank.** Find newsletter articles or share yours with other ADCs and the ADEAR Center. Go to: www.nia.nih.gov/Alzheimers/ResearchInformation/ResearchCenters and click on "ADC Article Database." Contact: Jill Chance at 240-235-1992 if you need help.
- **Collaborate on Materials.** Some of ADEAR's most popular materials originated at the ADCs. If you have developed a publication or video that might be useful for others, contact the ADEAR Center about the possibility of distributing or adapting your materials for a national audience.

For more information contact:
