# **P.L. 111 - 148, PATIENT PROTECTION AND AFFORDABLE CARE ACT**

## **Sec. 4103: Medicare Coverage of Annual Wellness Visit - Providing a Personalized Prevention Plan**

---

- “Detection of any cognitive impairment” is specifically listed as an element in the law.
- Is required as part of the AWW by the Centers for Medicare and Medicaid Services (CMS) Medicare.
- Effective 01/2011

# Detection of Any Cognitive Impairment

## P.L. 111-148, Sec. 4103

---

- Assessment of an individual's cognitive function by direct observation, with due consideration of information obtained by way of patient report, concerns raised by family members, friends, caretakers, or others.
- Public commenters noted that this definition was vague and suggested adding a standardized screening tool.

# CMS Questions

---

- Should we screen for dementia in general?
- How should we detect any cognitive impairment?
- Is there an evidence-based assessment tool that could be used during the annual wellness visit?
  - sensitive and specific (to limit over-diagnosis)
- Are there recommendations on referrals and follow-up of individuals identified with cognitive impairment?
  - inappropriate and/or ineffective treatments
