New features

NACC in the news — honors, awards, etc.

Quick links

The screenshot shows the NACC homepage with several red arrows pointing to specific features:

- Reorganized menu:** Points to the top navigation bar containing links like "Researcher home", "About NACC data", "Interactive tools", "Request NACC data", "Forms & documentation", "For researchers & authors", and "More information".
- New features:** Points to the "Query system" section, which highlights new features like "Cross-tabulations of UDS and NP data", "FTLD Module data", "User-friendly drop-down menus", and "NACC derived variables".
- NACC in the news — honors, awards, etc.:** Points to the "Project using NACC data wins Hirano Award" section, which mentions a presentation featuring NACC data winning the 2014 Hirano Award from the American Association of Neuropathologists.
- Quick links:** Points to the "Quick links" section, which provides a list of links for a quick look at NACC's resources, including "Forms & documentation", "Description of the database", "Demographics & Dx summaries", and "Ongoing & completed research".

The homepage also includes a "NEW at NACC" section, a "FOR RESEARCHERS USING NACC DATA" section with "Information and resources", and a "Free consultation available" section.

FOR RESEARCHERS USING NACC DATA
Information and resources
The National Alzheimer's Coordinating Center (NACC), established in 1999, maintains a cumulative database including clinical evaluations, neuropathology data when available, and now MRI imaging. **NACC invites researchers throughout the AD community to take advantage of this valuable resource.**
The data are contributed by the 34 past and present Alzheimer's Disease Centers (ADCs) supported by the U.S. National Institute on Aging/NIH, where all enrolled subjects undergo a standardized evaluation. The clinic-based population includes subjects with Alzheimer's disease and related disorders, as well as cognitively normal subjects and those with MCI.
The NACC database comprises several standardized clinical and neuropathology data sets, all of which are freely available to the research community. **No password or account is required**, and no affiliation with the NIA Alzheimer's Disease Centers is needed.
Quick links
Try these links for a quick look at NACC's resources. To explore the site in greater depth, use the drop-down menus above.

For authors
Checklist for authors
Submit an abstract or manuscript
Free consultation available
When you request NACC data, NACC research scientists can save you time, providing help with:
• **Checking a project's feasibility with NACC data**
• **Creating a custom file for data analysis**
• **Specifying variables**
• **Statistical methods**
• **Data analysis**
[Email NACC](#) for more information.
NACC is funded by the National Institute on Aging (U01 AG016976) and located in the Department of Epidemiology at the University of Washington School of Public Health, Walter A. Kukull, Ph.D., Director. Copyright © 2010 University of Washington.
