

# Introduction to NIAGADS

*ADC Director's Meeting Spring 2014*

**Li-San Wang, Ph.D.**

Principal Investigator

**NIA Genetics of Alzheimer's Disease Data Storage Site**

University of Pennsylvania Perelman School of Medicine

U24-AG041689

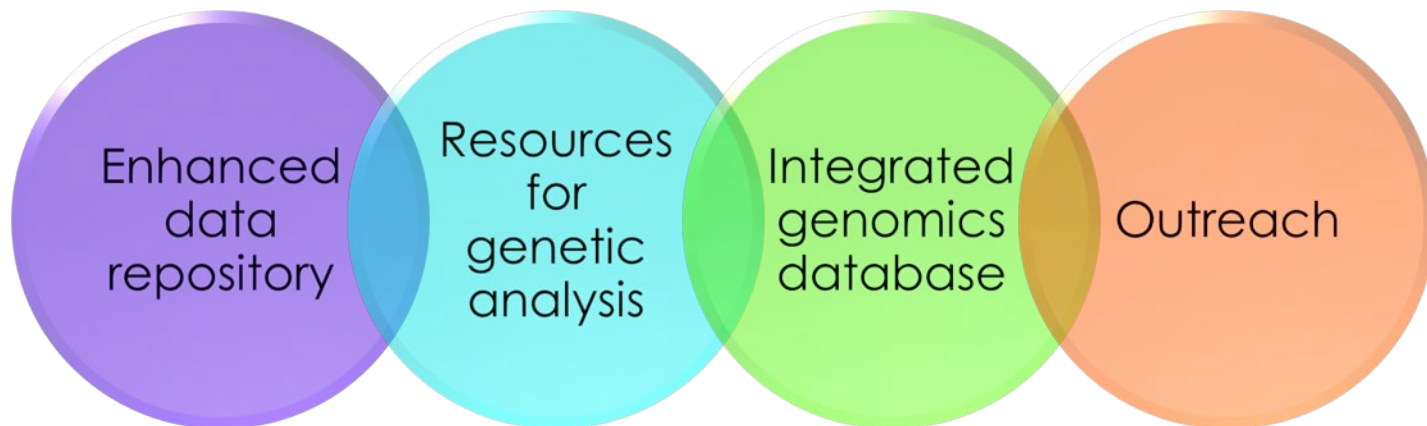

**NIAGADS**

# NIAGADS Objectives

## One-step data access portal and community resource for AD genetics research

- ▣ Supported by NIA cooperative agreement U24-AG041689
- ▣ Facilitate data sharing, reanalysis, and collaboration
- ▣ Post-GWAS: integration to functional genomics knowledge and data
- ▣ Path to therapeutic discovery

# Datasets

- We currently host 26 datasets with 42,531 subjects and 29.5 billion genotypes
- Most of ADGC1 data are available for download; cohort PIs are committed to make data available at NIAGADS
- Secondary data
  - ADGC GWAS summary statistics
  - Imputation data
  - Quality control and population structure
- Data portal for ADNI WGS data (Summer 2014). Login with your ADNI account to download VCF and BAM files

# AD Sequencing Project

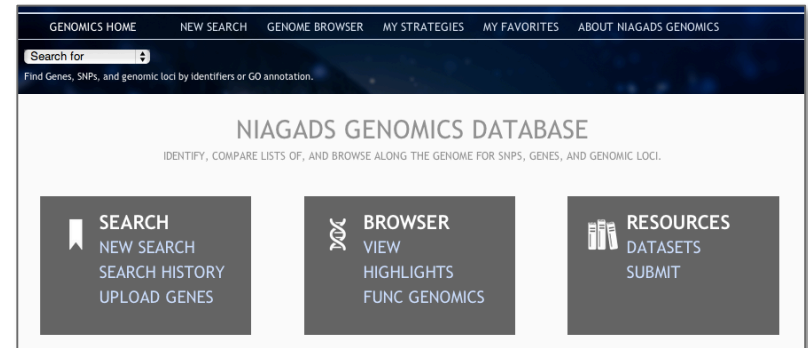

- ▣ Announced in Feb. 2012
- ▣ Participants
  - ▣ NIA, NHGRI
  - ▣ ADGC and CHARGE
  - ▣ Large-Scale Genome Sequencing and Analysis Centers (Broad/Baylor/WashU)
  - ▣ NACC (phenotype) and NCRAD (sample)
  - ▣ NIAGADS (data coordinating center)
  - ▣ NCBI dbGaP/SRA
- ▣ Visit ADSP website [www.niagads.org/adsp](http://www.niagads.org/adsp) to learn about study design, apply for data access, download data
- ▣ WGS data of 584 subjects available from our [ADSP data portal](#)
- ▣ Applications will be reviewed by NIH DAC and NIAGADS DUC for secondary data sharing

### NIAGADS - The NIA Genetics of Alzheimer's Disease Data Storage Site

NIAGADS (NIA Genetics of Alzheimer's Disease Data Storage Site) is a national genetics data repository that facilitates access of genotypic data to qualified investigators for the study of the genetics of late-onset Alzheimer's disease. It is the policy of the NIA that all genetic data derived from NIA-funded studies for the genetics of late-onset Alzheimer's disease be deposited at NIAGADS, another NIA-approved site, or both. NIAGADS, along with other NIA-approved sites, will make these Genetic Data and Associated Phenotypic Data available to qualified investigators in the scientific community for secondary analysis.

- We would like to visit your center to introduce NIAGADS and talk with your team to see how we can help
- Let us know what features you would like to see
