**Collaboration**

**E, F**

**Enablement**

**G, H**

Arrows  
To all  
**A - G**

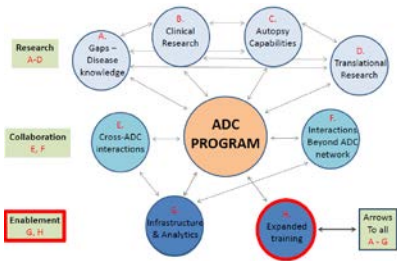

### □ Personnel level

- Identify/address obstacles that differ among various groups of personnel required to staff ADC efforts
- Facilitate staff training from diverse backgrounds appropriate to local landscape
- Develop personnel exchanges among Centers for leveraging expertise, joint mentoring of fellows for inter-professional trans-disciplinary and cross-training opportunities (n.b., also in Theme F: Enablement – interactions beyond ADC network)
- Develop approaches to attract information science specialists

# Enablement Theme

## Topic H – Expanded Training

### □ Programmatic level

- Training programs/courses to foster diagnostic and treatment capabilities, cognitive health in aging & integrate dementia content into health profession curricula
  - e.g., HRSA's Geriatric Workforce Enhancement program, VA's GRECCs, etc.
- Training incentives for primary care physicians, nurse practitioners, physician assistants to inform patients about clinical trials and recruitment (n.b., also in Theme B – clinical research)
- Enhance cross-training among established & emerging Centers, between basic & clinical scientists within ADCs, and among ADC researchers and industry scientists
- Support training program administration through, e.g., T32's

# Within Other Themes

- Within Theme A: Research Theme, gaps in disease mechanisms and risks:
  - ▣ Focus: Research participants and families
    - Foster education/support to ensure that clinical endpoints are meaningful
    - Programs for ongoing feedback from participants as source of learning for ADCs.
  
- Within Theme C: Research Theme, autopsy capabilities:
  - ▣ Create opportunities for training of neuropathologists in the sub-field of neurodegenerative disease research
  
- Within Theme G: Enablement Theme, infrastructure & analytics
  - ▣ Align data science training and other activities to ensure effective discovery and use of resources
