

NACC Data Update

2020 Fall ADRC Meeting

October 1, 2020

Kari Stephens, Sean Mooney, Merilee Teylan, Brian Stahly,
Ashleigh Lewis, Nic Dobbins, Bud Kukull

University of Washington

Who we are

Kari A. Stephens, PhD

Associate Professor

Director of Clinical Research Informatics

Department of Family Medicine

University of Washington

Sean D. Mooney, PhD

Professor

Chief Research Information Officer

UW Medicine

NACC vision

- Facilitation of a more collaborative consortium
- Harmonization of data through use of shareable forms, common data models, standard nomenclature, etc.
- Self service access to data using internet technology
- Better prepared to enable machine learning/data science using integrated data through consultation and cloud enclaves
- Integration of new data types — *e.g., claims or EHR data*
- Improved access to consortium biospecimens

Today presenting work we are doing to improve NACC informatics

Infrastructure — Leveraging the Cloud for NACC's Data Infrastructure

Data collection — Developing shareable forms utilizing REDCap for data capture

Self-service access — Providing a self service NACC Data query tool using Leaf

Clinical data — Increasing use of administrative datasets and EHR datasets within the ADRC Consortium

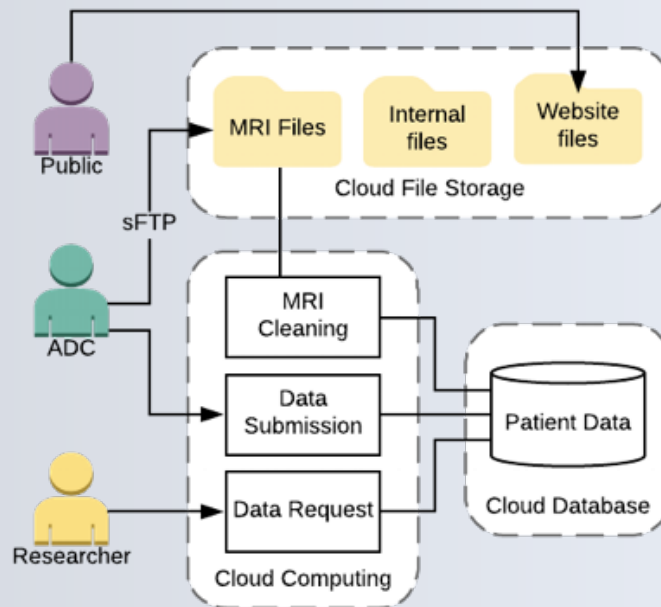

NACC data and informatics milestones accomplished

- COVID adaptation: Remote UDS packet (TFP/TIP) and neuropsych data
- Data distribution: 310+ data requests completed
- New collaboration with SCAN — image data
- New website Live! <http://naccdata.org>
- Cloud enabled
- New modules and revisions

NACC's data infrastructure is Cloud native

Advantages of the Cloud:

- More FAIR (findable, accessible, interoperable, reusable)
- More collaborative
- Use of open APIs
- Better modularization
- Custom apps possible
- Integration with national cloud infrastructure at NIH possible

Opportunity to leverage EHR data with ADRCs

Recently, collection of EHR data has become very useful for research with many multisite networks forming Data models have emerged that can support useful and easy collection of electronic health record data or administrative claims data

Potential of EHR and other data linkages to propel AD/ADRD research

NACC's goal is to support ADRCs to leverage existing local institutional infrastructure to collect and harmonize electronic health record data and claims data to enhance other existing data offerings within the ADRC network

EHR and Claims data can augment existing and planned clinical research data sets

Standardize consent for linkages

Next steps: If your ADRC is interested in EHR linkages, please reach out to nacchelp@uw.edu

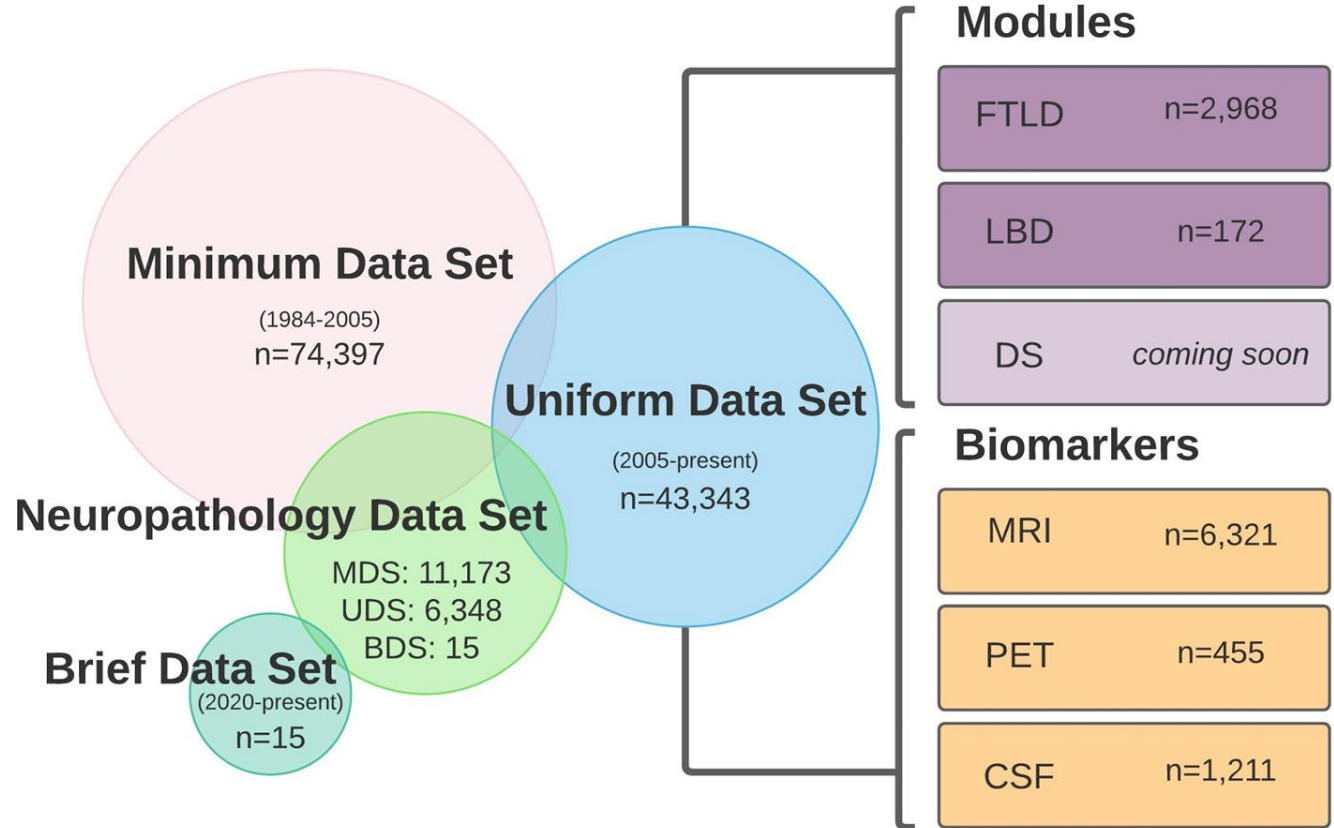

Roadmap for today

Following presentations:

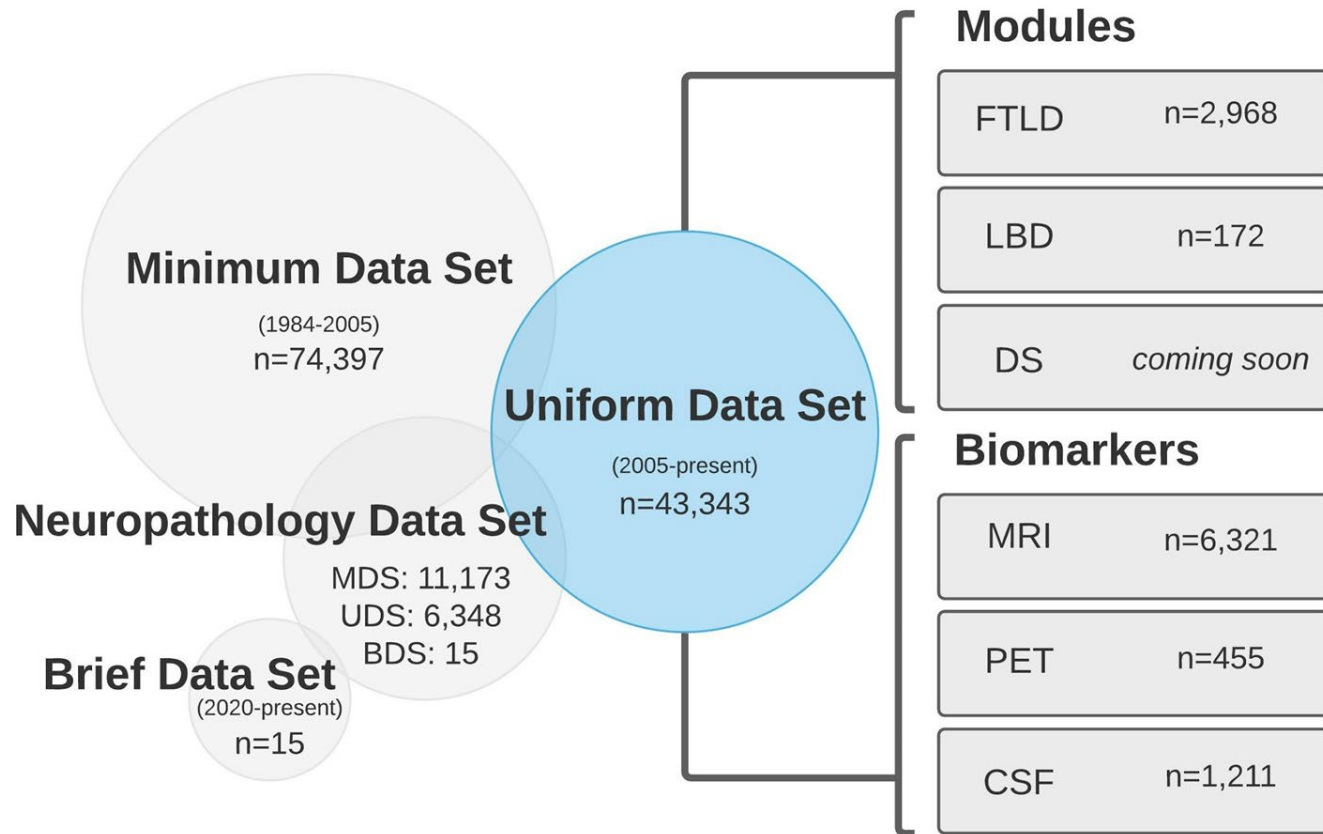

- NACC's data inventory: Update on the NACC database and collection forms
- Data capture: Data collection and new support for REDCap
- Data access: Self-service access to data sets: Leaf
- Q&A

NACC's data inventory

The NACC Database

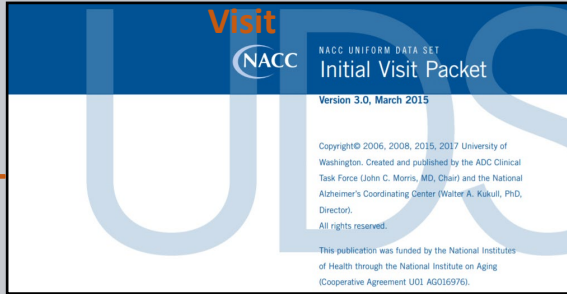

Uniform Data Set

What's new with UDS data collection?

In-person

Initial Visit

Follow-up Visits

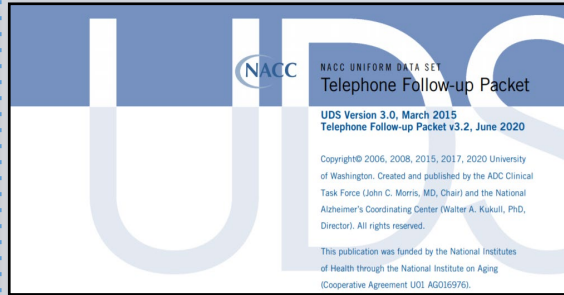

Remote Neuropsychological Test Battery

Remote

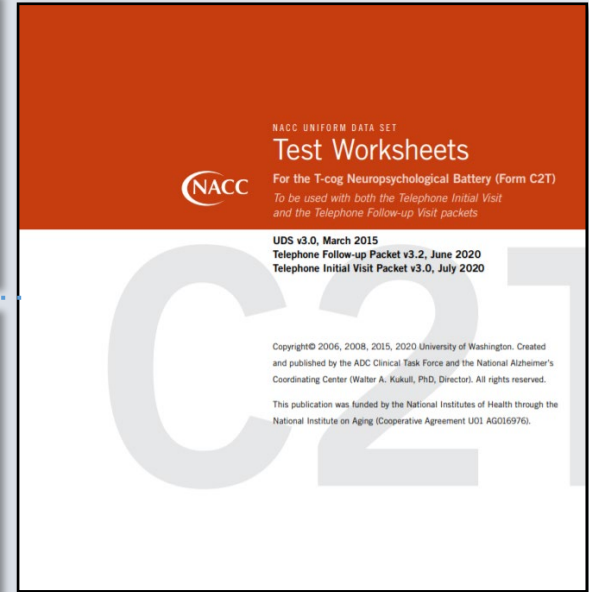

Telephone Initial Visit Packet

Telephone Follow-up Packet

Test Worksheets

UDS remote assessments

UDSv3 Packet information

Table 1. Required and optional forms included in [UDSv3 packets](#) *

Form	IVP	FVP	TIP	TFP	Summary of changes made for TIP	Summary of changes made for TFP
T1: Inclusion Form			•	•	Adapted TFP version of the form for initial visit	Added response option to capture COVID-19 as a reason for telehealth visit; Added question about modality of administration (telephone, video conference, combination)
A1: Subject Demographics	•	•	•	•	—	—
A2: Co-participant Demographics	◦	◦	•	•	Made a required form (i.e., not required for IVP or FVP)	—

COVID-19 Impact & Technology Surveys

Join tomorrow's
Directors Meeting
(10am-12:30pm ET)
to learn more

COVID-19 Impact Survey: Participant

ADC name: _____
Examiner's initials: _____

COVID-19 Impact Survey — Co-participant

1. _____

COVID-19 Technology Accessibility Survey

ADC name: _____ Subject ID: _____ Form date: ____/____/____

Examiner's initials: _____

Instructions: This form is to be filled out by either the participant (if CDR® Dementia Staging Instrument

NACC implementation of remote assessments

	CTF/Work Group ratified	Clinical documents released	Database documents released	Database submissio n live
Telephone Follow-up visit Packet (TFP) v3.2				
Telehealth Cognitive Battery (T-Cog)				
Telephone Initial visit Packet (TIP) v3.0				
COVID Impact Survey				
COVID Tech Accessibility Survey				

	Complete
	In progress

Spanish-translated remote assessments

	English Forms		Spanish Forms	
	CTF/Work Group ratified	Clinical documents released	Latino ADC Group ratified	Translated documents released
Telephone Follow-up visit Packet (TFP) v3.2				
Telehealth Cognitive Battery (T-Cog)				
Telephone Initial visit Packet (TIP) v3.0				
COVID Impact Survey				
COVID Tech Accessibility Survey				

	Complete
	In progress

Neuropathology Data Set

NP data collection — without MDS or UDS

NACC Brief Data Set (BDS) + NP Form

NACC
National Alzheimer's Coordinating Center

NACC BRIEF DATA SET

Form BDS: Brief Clinical Data Capture for NP Submission

ADC name: _____ Subject ID: _____ Form date: ____/____/____

Examiner's initials: _____

DEMOGRAPHICS	
INSTRUCTIONS: This section is to be completed based on medical records, existing research data, and proxy report.	
1. Participant's month and year of birth (MM/YYYY):	____/____
2. Participant's sex:	1. <input type="checkbox"/> Male 2. <input type="checkbox"/> Female
3. Did this participant report being of Hispanic/Latino ethnicity?	0. <input type="checkbox"/> No

NACC
National Alzheimer's Coordinating Center

The Neuropathology Data Form

ADC subject ID: _____ Completed by: _____

1. MDS/UDS patient ID	_____
2. Date form completed (MM/DD/YYYY)	____/____/____
3. Neuropath ID	_____
4. Sex (CHECK ONE)	<input type="checkbox"/> 1 Male <input type="checkbox"/> 2 Female
5. Age at death	____ years
6. Date of death (MM/DD/YYYY)	____/____/____
7. Postmortem interval (PMI): time between death and brain removal	____ . ____ hours (99.9 = unknown)

How to submit BDS data?

NPDSS

NACC Neuropathology Data Submission System

Form Versions 1 Thru 10

NP HOME

UPLOAD and PRE-PROCESS FILES

WEB DATA ENTRY

BDS FORM

ERROR CHECK

U Washington

Neuropathology Data Submission System

Upload Files Button : Upload files to the working database

Web Data Entry Button : Add, edit, delete and/or display data

Error Check Button : Execute error checks and verify alerts

What's new with NP data collection?

Join tomorrow's **NP Core Leaders Session (12:45-2:45pm ET)** to learn about **Version 11** of the NACC NP Form and Guidebook

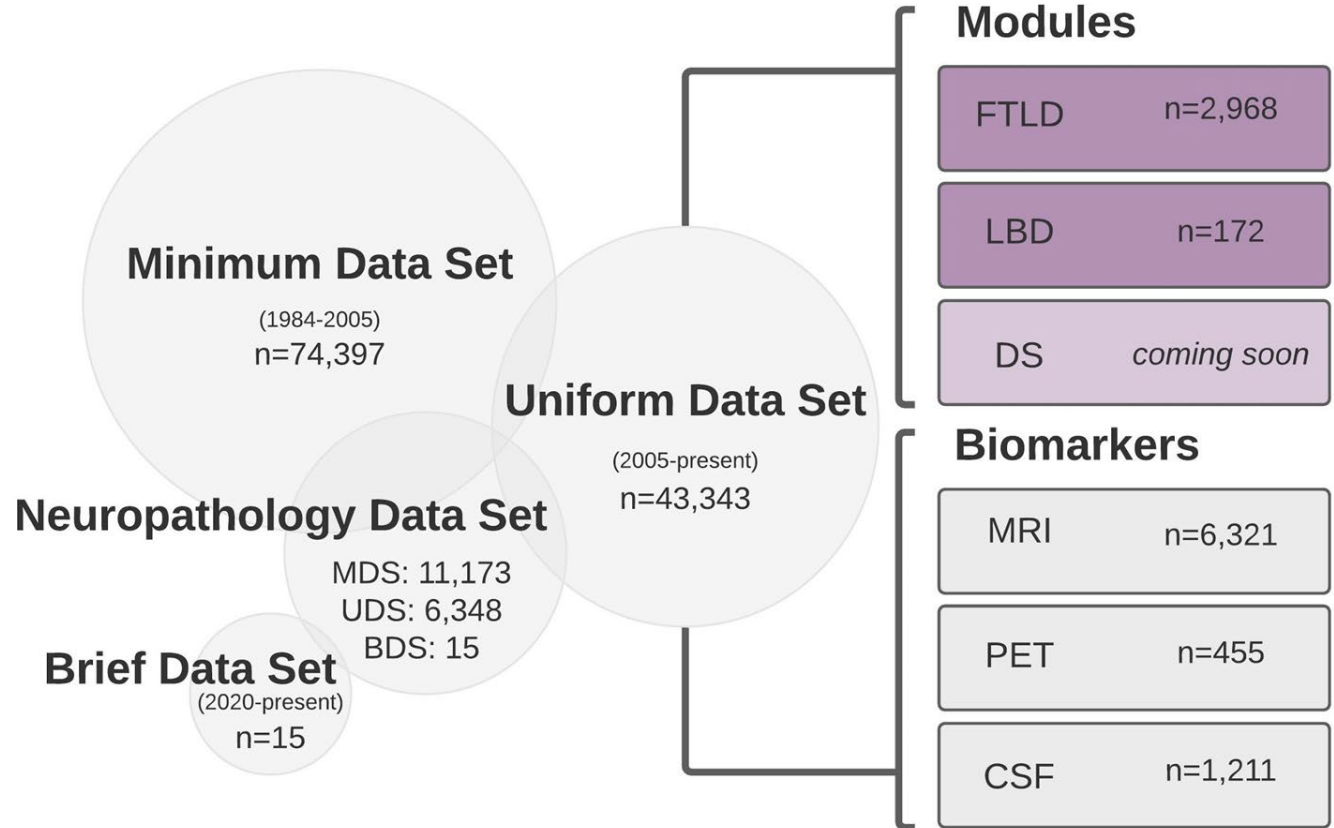

NACC implementation of BDS and NPv11

	CTF/Work Group ratified	Clinical documents released	Database documents released	Database submission live
Brief Data Set				
NPv11				

	Complete
	In progress

Modules

LBD Module v3.1

Coming soon: Down Syndrome Module

Collaborative effort with
Alzheimer's Biomarkers
Consortium — Down
Syndrome (ABC-DS)

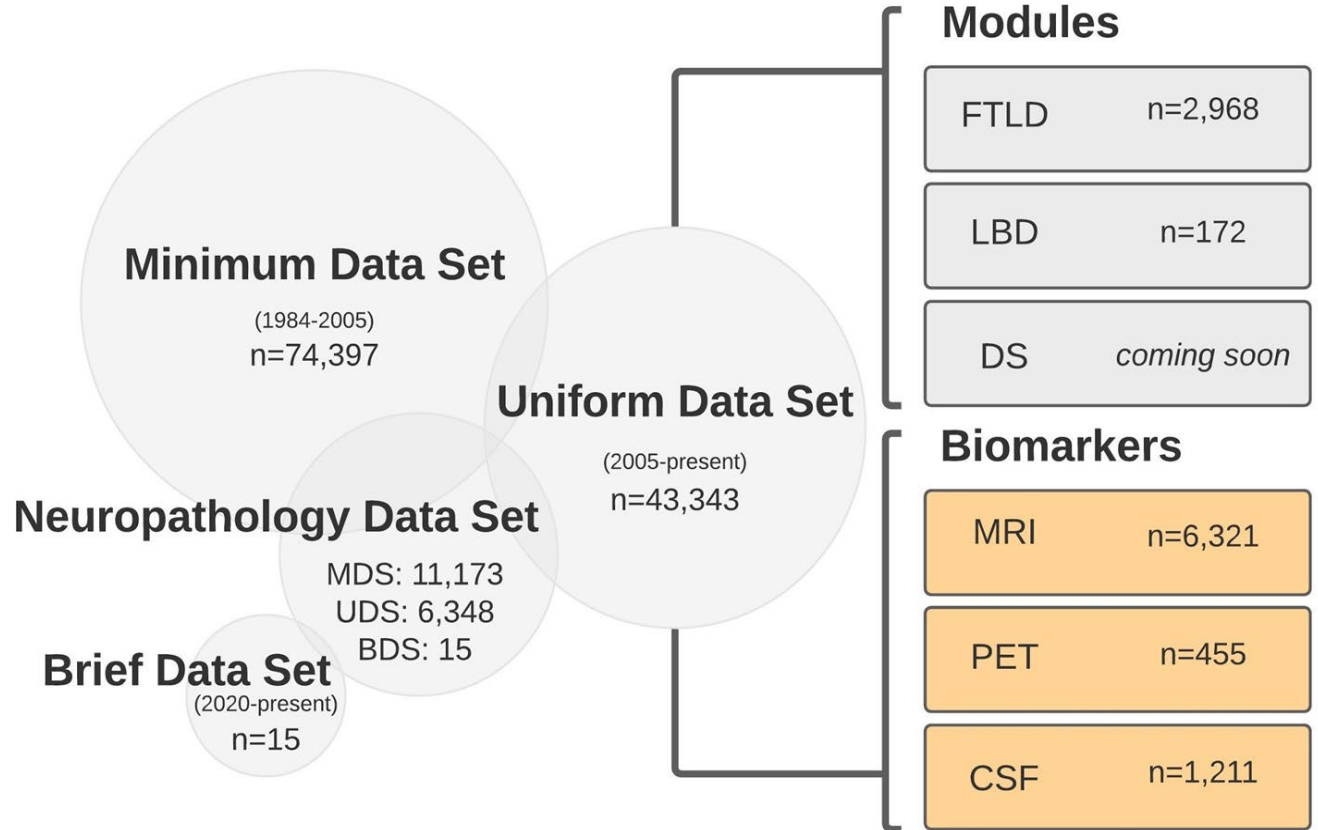

NACC module implementation

	CTF/Work Group ratified	Clinical documents released	Database documents released	Database submission live
LBD Module v3.1				
DS Module				

	Complete
	In progress

Biomarkers

MRI cleaning processor — Progress update

- 13 ADRCs participated in our pilot
- Successfully processed over 70% of the legacy scans contributed to NACC through the old system
- Nearly 4,000 additional scans have been submitted to the new system
- Invitation to all ADRCs to the new system

Questions about data forms or submission?

Partners

Data capture

How we're streamlining data collection

Research Electronic Data Capture

- Leading tool in clinical research with over 4500 institutions worldwide currently utilizing
- Web based
- Built for research by researchers
- HIPAA-compliant
- Highly customizable with external modules
- Seamlessly allows sharing projects/data collection instruments between sites

University of Washington ITHS REDCap instance

- One of the largest REDCap instances in the REDCap consortium
- Supporting over 12,000 active users with over 25,000 projects
- UW REDCap team administers and ensures security of REDCap for other National Studies
- Allows data upload from other REDCap supported sites
- Comprehensive support model

Human Infection With 2019 Novel Coronavirus Person

Adding new Record ID 1

Record ID: 1

Patient first name: Harry

Patient last name: Potter

Date of birth: 07-31-1980

Reporting jurisdiction: WA

Reporting health department: King County

Contact ID #: 738A

Case State/local ID: WA

CDC 2019-nCoV ID: 37js992

NNDSS loc.rec.ID/Case ID #: 89833

a. Only complete if case-patient is a known contact of prior source case-patient. Assign Contact ID using CDC 2019-nCoV ID and sequential contact ID, e.g., Confirmed case CA102034567 has contacts CA102034567-01 and CA102034567-02.

b. For NNDSS reporters, use GenV2 or NETSS patient identifier

Name of interviewer: Last Name: Granger

Affiliation/Organization: UW

Email: granger@hogwarts.ed

First Name: Hermione

Telephone: (555) 555-5555

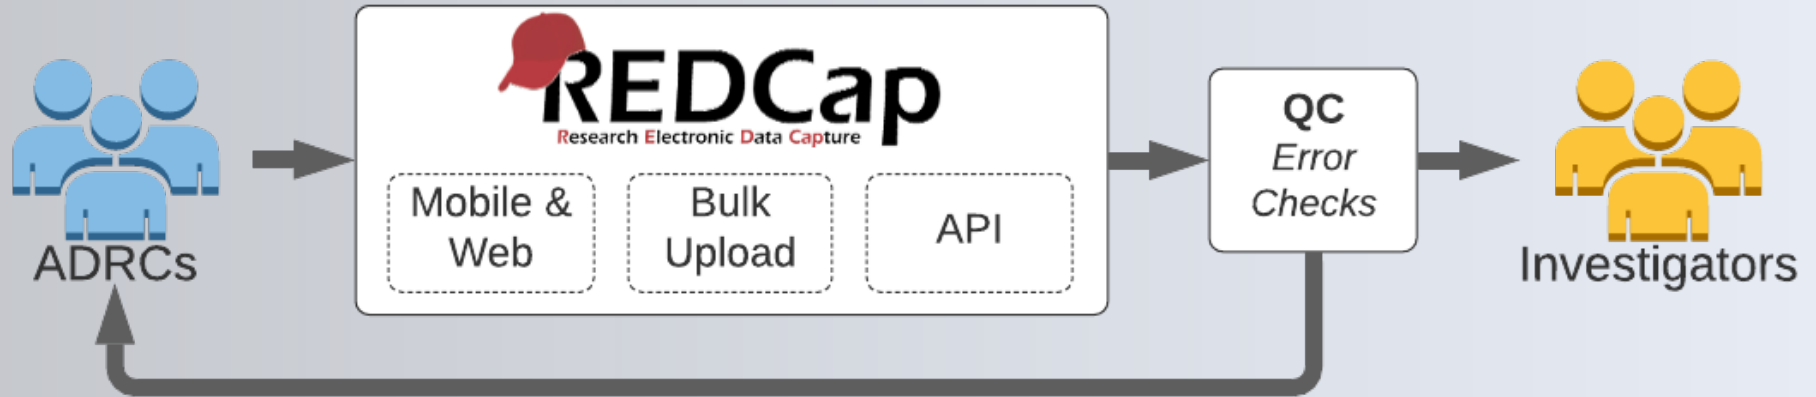

Thanks to our ADRC REDCap community!

Sharing files, tools, and advice with the greater community has:

- Helped standardize tools across the ADRCs
- Helped new centers get set up quickly
- Greatly reduced duplicated work
- Given NACC a head start implementing REDCap

Where does REDCap fit into data submission?

How do we get there?

1. Set up COVID-19 Surveys
2. Configure user access
3. Invite users to try things out
4. Integrate QC and distribution systems
5. Set up additional forms

What does this mean for you?

- Faster release of forms and modules
- Improved upload options (web interface, API)
- An even more streamlined process for ADRCs using REDCap for their own data capture

Please enter any questions / comments into the Q&A, and you're welcome to email us at nacchelp@uw.edu

**We welcome your questions and feedback
about REDCap!**
Post in the Q&A or email nacchelp@uw.edu

Data access

How people get data

The prototype is live at naccddata.org, check it out!

- Simplified layout and navigation
- Accessible & mobile-friendly
- Streamlined access to submission systems

The existing website will be kept online through October as we wrap up this work.

We'd love to hear your feedback during this time!

Improvements to data access: Leaf!

Leaf is a tool that will allow authorized users to view and download NACC data in-browser.

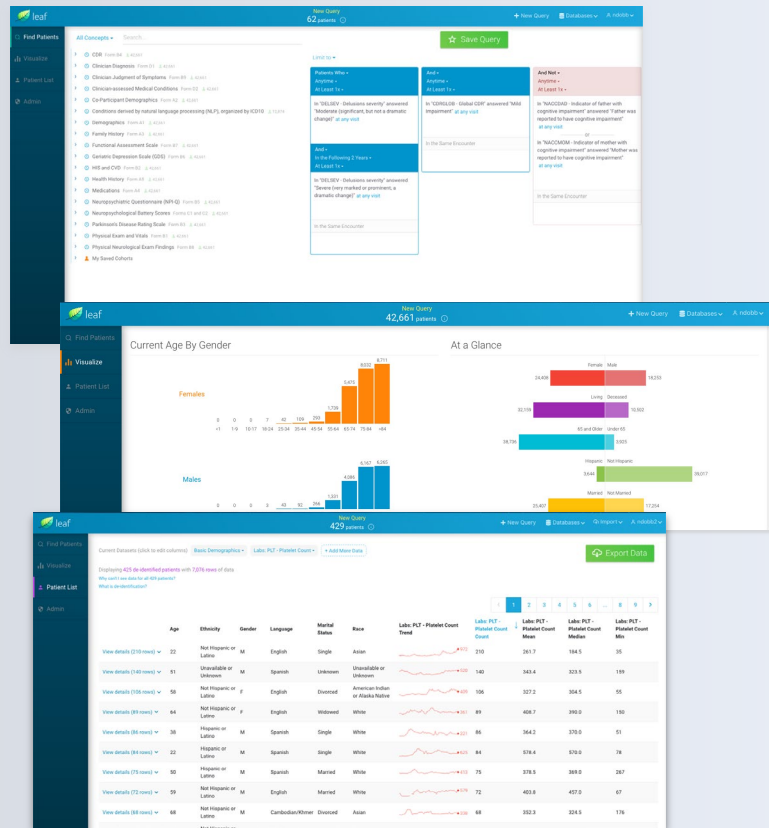

Connections with NCRAD, NIAGADS, and SCAN data will be possible with shared study IDs.

Leaf will help NACC become a one-stop-shop for data access.

Leaf — Clinical Data Explorer

- Free, open-source web application for cohort discovery
- Adaptable to nearly any clinical database
- Developed at UW Medicine Research IT
- In use or being piloted at 10+ academic medical centers, including:
 - Johns Hopkins
 - University of Chicago
 - University of California at Irvine
 - University of Washington

Leaf — Clinical Data Explorer

Leaf with NACC

- Current prototype includes NACC UDS data
- Leaf will be a self-service application
- Leaf will be available only to users who are authorized and have signed Data Use Agreements
- Allows for:
 - Simple or sophisticated self-service queries in seconds.
 - Basic demographic visualizations
 - Fast, direct NACC data exports to .csv files
 - And more...

Questions and answers

Please submit any questions or comments in the Q&A.
Thanks for coming!
