

# Impact of DMT's on Observational Studies

# ADNI4 Participant Recruitment Flow

Novoic Storyteller test remotely administered to all ADNI

# Mayo Clinic Study of Aging

**Population-based study of aging (7000 total/3000 active)**

**Random sample of persons ages 30-89 years**

**Annual clinical evaluations since 2004**

**Evaluations blinded to diagnoses and biomarkers**

**Serial neuroimaging**

**Longitudinal fluid biomarkers**

# Allowing use of DMT's

## Challenges

- Disruption of observational study data
- Return of results
- Discontinuing the study

## Opportunities

- Evaluate effects of treatments in a structured manner
- Use run-in data
- Follow with biomarkers
- Autopsies
