

UDSv4 Pilot Survey Results

Jessica Culhane, MS

10/17/2024 – Fall 2024 ADRC Meeting

NACC UDSv4 Pilot Complete!

Benefits

- **Actionable feedback** on UDSv4 resources, tools, and timelines
- **ADRCs gained experience:**
 - Obtaining IRB approval
 - Administering the new UDSv4 forms
 - Collecting and submitting UDSv4 data
 - Leveraging UDSv4 documentation and training materials

A decorative background featuring a network diagram with teal lines and dots of varying sizes and colors (teal and light blue) connected in a complex web pattern.

Participation

NACC UDSv4 Pilot Survey Results

23 ADRCs Participated in the Pilot

- 16 ADRCs tested clinical core participants
- 1 ADRC tested mock participants
- 6 ADRCs did not administer to participants

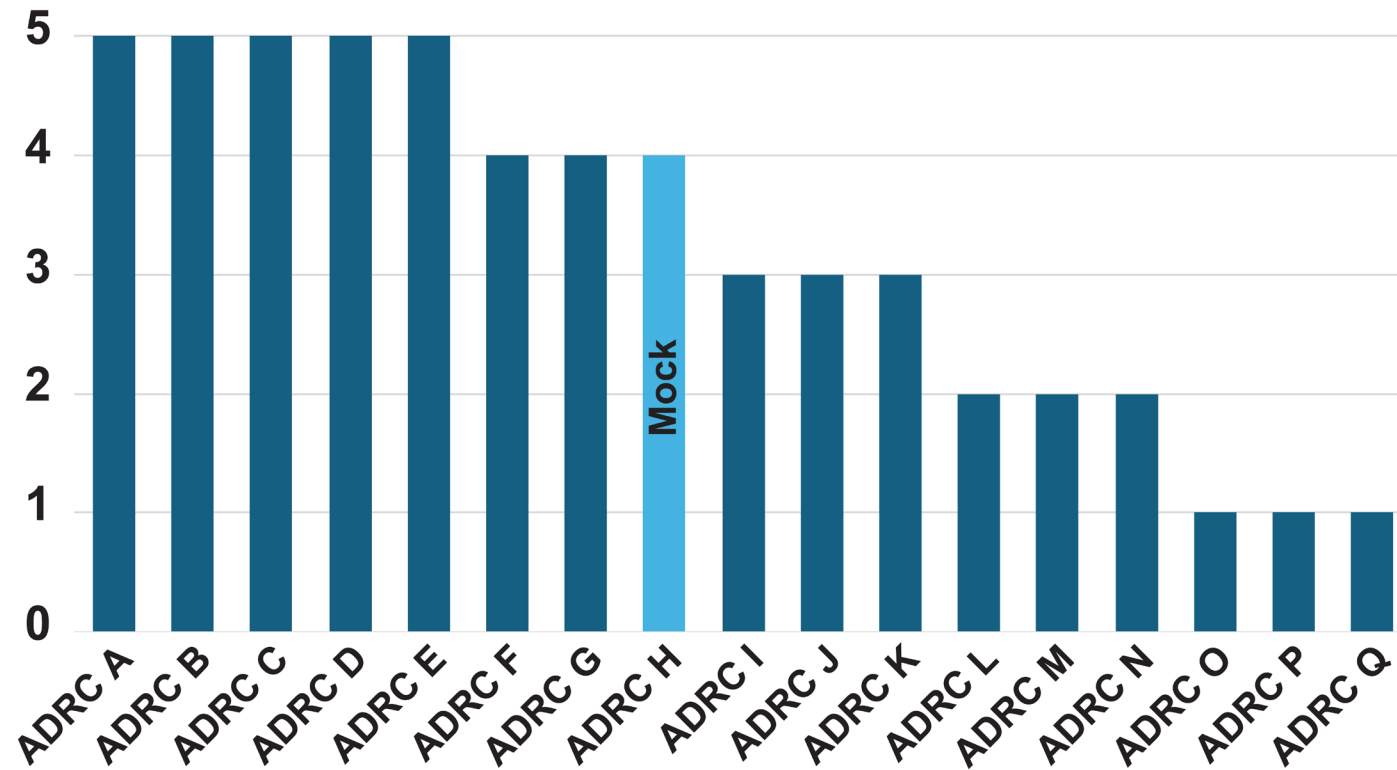

August 2024 Survey

NACC UDSv4 Pilot Survey Results

Piloted an average of 3 participants per site

**Number of
Participants**

n = 55

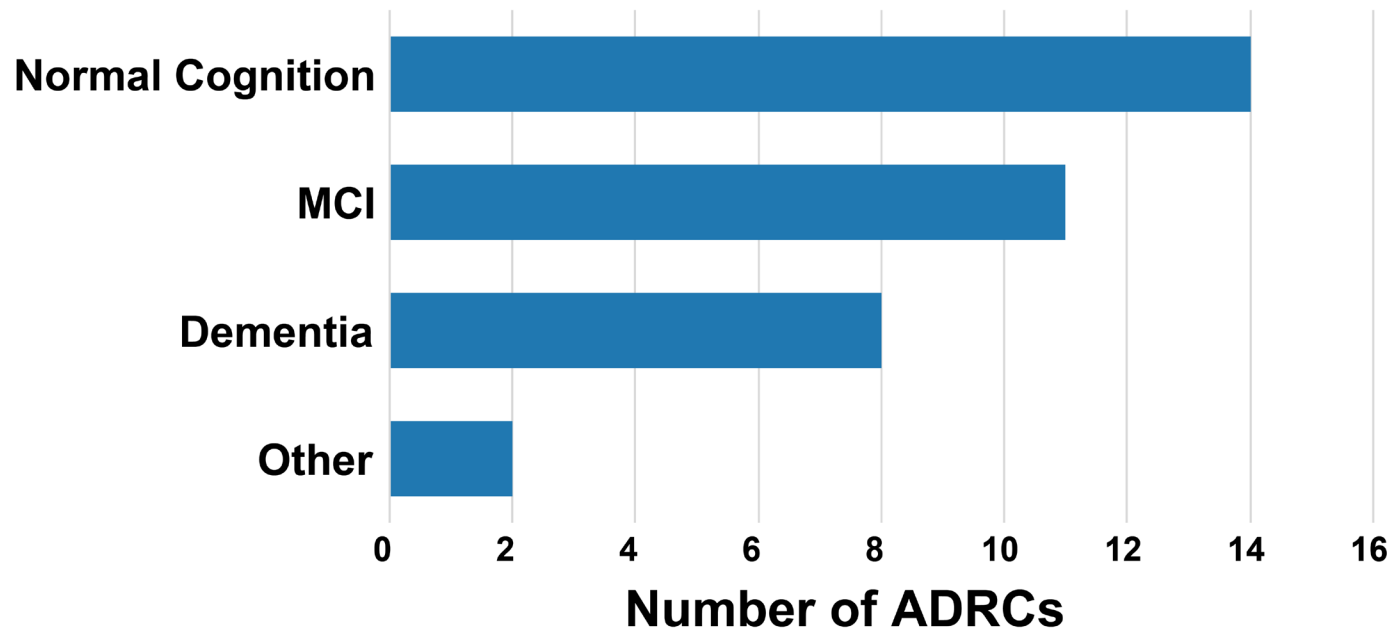

August 2024 Survey

NACC UDSv4 Pilot Survey Results

Participants with a range of cognitive statuses were included

NACC UDSv4 Pilot Survey Results

Addressing Common Feedback

- IRB approval
- Pre-visit forms
- Edits to Forms A1a (SDoH) and D1b (Etiologic Diagnoses and Biomarkers)
- Additional clarifying guidance in the Coding Guidebook
- Additional FAQ (SDoH) and live training (e.g. DSM-5)
- A4a (ADRD-Specific Treatments) video training
