

# Reasons for Diversity Reporting in Progress Reports

1. We get requests for information
  - From NIH, NIA, NACA, White House, Congress, media
  - Sometimes need summary of all centers, sometimes need highlights, examples
2. Helps us to inform partners/collaborators (advocacy groups, professional associations, etc.) about work that supports our common mission, goals and objectives
3. We get information about available funds
  - If we know your successes and barriers, it's easier for us to coordinate information flow
4. This information is useful to have for your competing renewals
